

Ghostbeam - Invisible Flashlight Widget

Privacy Policy

This privacy policy governs your use of the software application

Ghostbeam for mobile devices running Android. **Ghostbeam** was created by Nick Meessen - de Wit and the source is publicly available at <https://github.com/nickmeessen/ghostbeam>

Ghostbeam is an invisible 1x1 widget that switches your Camera LED on or off for your phone to suffice as an flashlight. This has been specifically designed to be invisible since some people like their homescreens clutter-free.

What information we collect?

Ghostbeam does not collect any personal information like name, surname, location, place of birth, contacts information. **Ghostbeam** needs access to Camera to turn on Camera LED. No recording in any form picture or video will be made or published.

Ghostbeam does not contain any advertisements or tracking.

Changes to Privacy Policy

Any future changes will be published here, <http://www.nickmeessen.nl/ghostbeam/privacy.pdf>
